QUESTIONS

1. Will suburbs cause overlap / impact visibility
2. Is this doable in mega-life
3. What is the story
 - bushfires
 - weather cycles

LAYOUT

Title: Dashboard

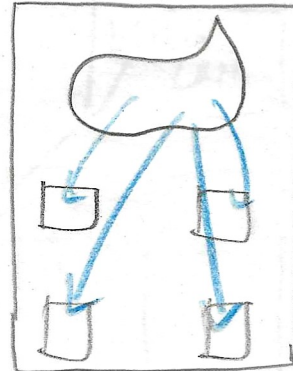

Author: Dylan Maxwell

Date: 1-10-24

Sheet: 2

Task: Visualisation of Aus weather

OPERATIONS

Year slider Filters map down

Clicking location

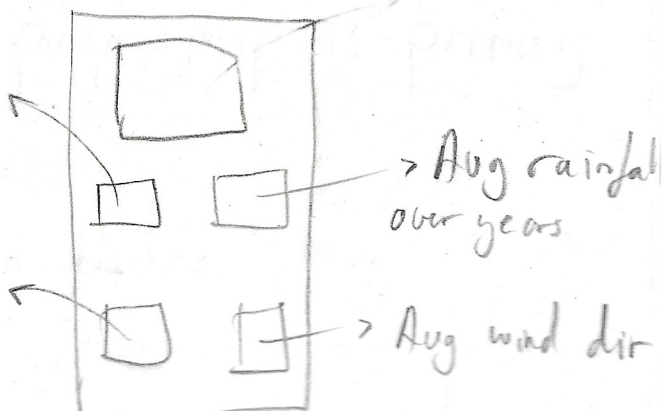

↳ shows more detail about individual location

FOCUS

- Map is primary focus

Temp over time

Weather Stats

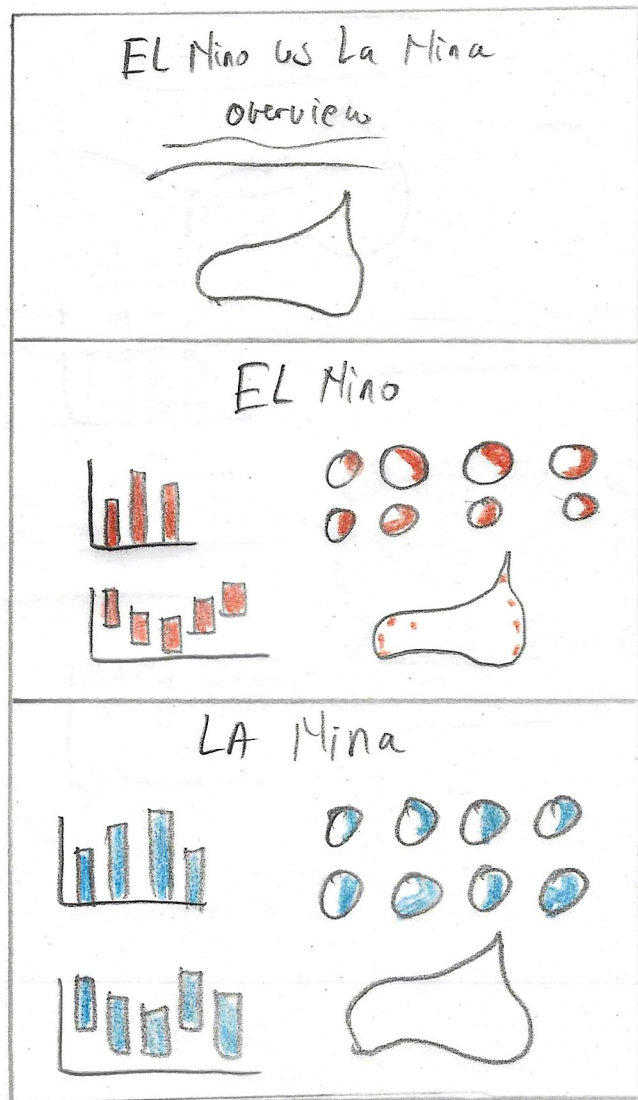

DISCUSSION

- No story

- Had with a lot of locations

Layout

3 page layout

Title: Dashboard

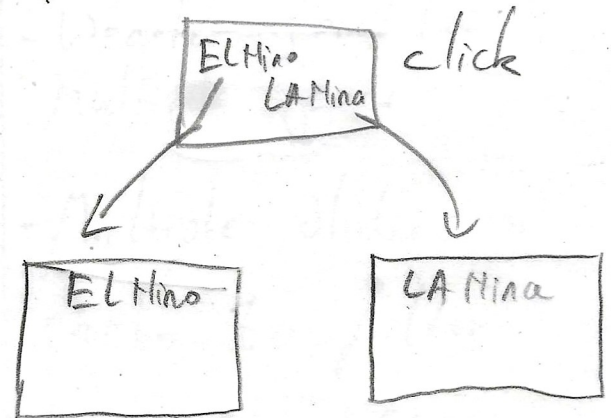

Author: Dylan Maxwell

Date: 1-10-24

Sheet: 3

Task: Viz of Aus weather

Operations

- Viewer is greeted by main page
- Pressing on labels redirects to other pages

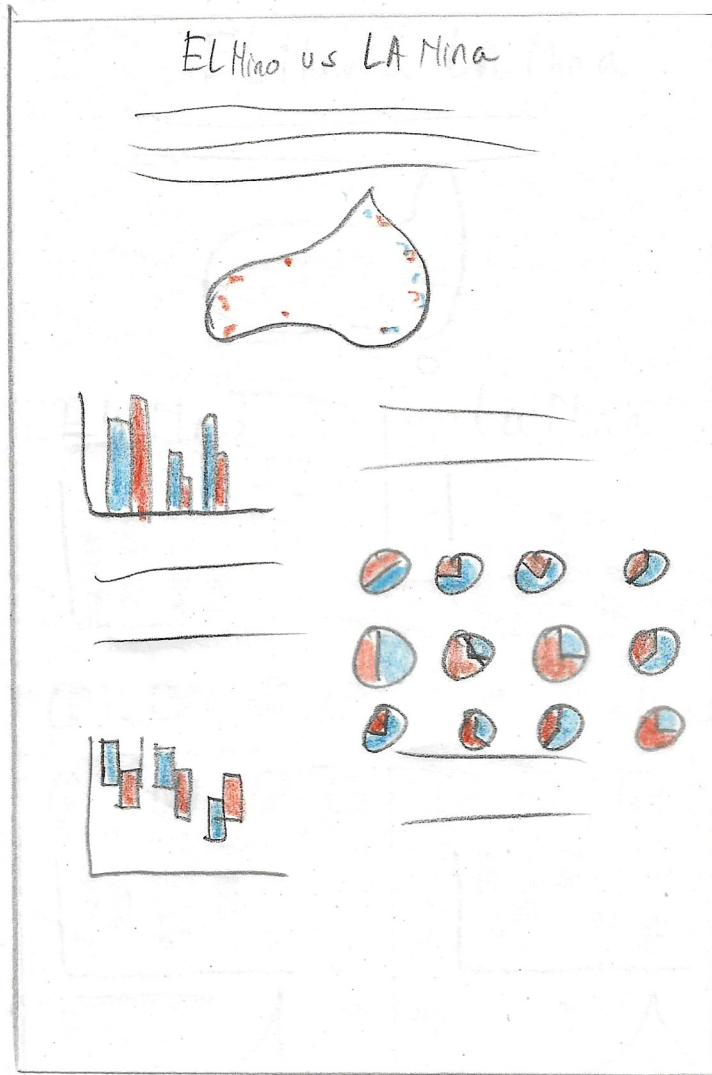

Focus

- Landing page, map is primary focus
- Then on other pages
 - ↳ equal focus to all plots

Discussion

- Is it intuitive to move between pages
- How can usability be maintained
- Why not all on one page

Layout

Title: Dashboard

Author: Dylan Maxwell

Date: 1-10-24

Sheet: 4

Task: Viz for weather in Aus

Operations

- Weather zones last multiple years
- Multiple sliders on each to filter through years

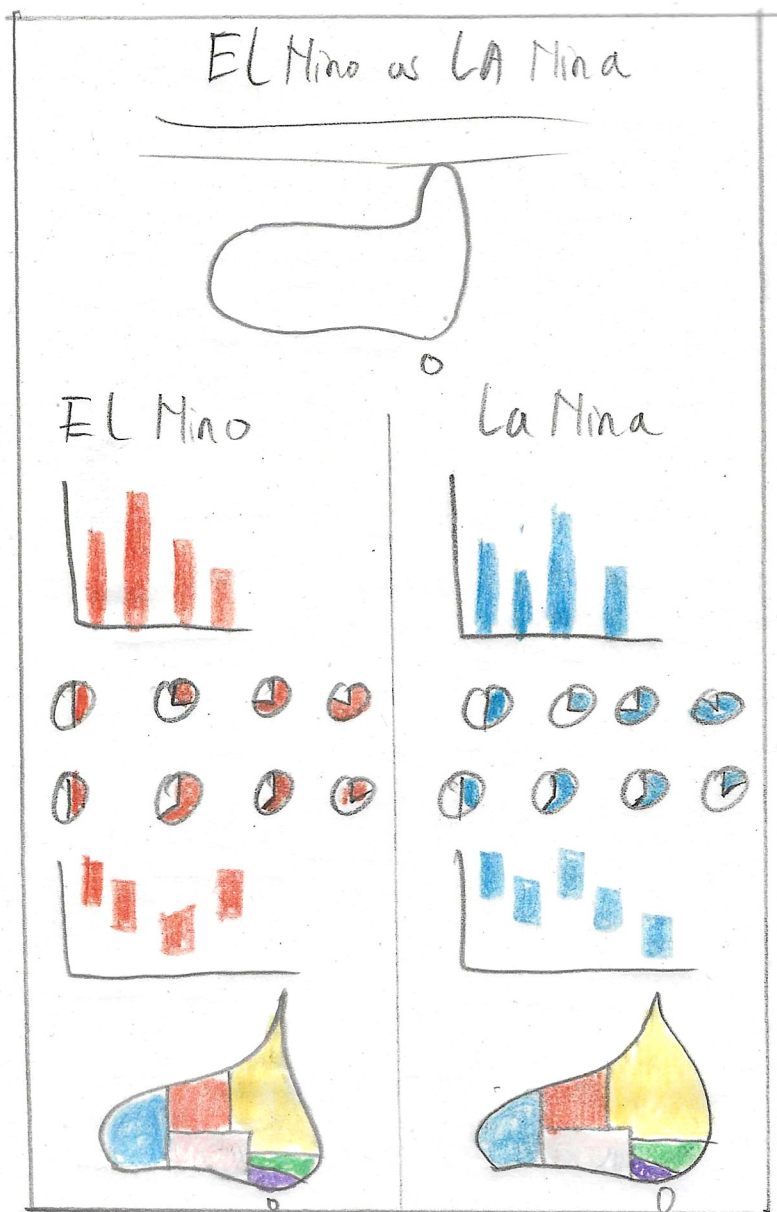

Focus

- Map is first focus
- Cascade down between charts

Discussion

- Is it easy to distinguish the two seasons on one chart?

Layout

Task: Find a way to
Author: Dylan Russell
Date: 1-10-24
Sheet: 5
Task: Viz of Aus weather

Operations

- Year filter to season years - main map
- State + year filter chart 3
- Head links to articles chart 4
↳ click to follow link

Focus

- Start at Central map
- Moves down each column
- Showing similar charts so users can compare between the two seasons

Details

1. Data cleaning needed (~3 hours)
2. Charts made (~2 days)
3. HTML page (~1 day)
4. CSS (~1 Day)
